Harold Woc

An MCP-Geo deep dive into the str
Harold Wood ward — London Bor
streets, matched to OS NGD road l

100	30+	E05013973
UPRNS SAMPLED	NAMED STREETS	WARD CODE

RM3
POSTCODE DISTRICT

Data sources: UPRNs from OS Places API, road link details from OS NGD `trn-ntwk-roadlink-5` collection. Attributes include road width, pavement coverage (left/right %), street lighting, cycle lane presence, and road classification — all derived via MCP-Geo tool calls. Street View links use Google Maps at the UPRN coordinates.

🚶 Walk the Streets of Harold Wood

Starting at Harold Wood Station

Step off the train at Harold Wood station and you're immediately on *Station Road* — the commercial spine of this suburban Essex neighbourhood. At

number 11, there's **Missy Moo Balloons**, a cheerful shop front, and just up at 35 you'll pass **Williams Bakery & Sandwich Bar**, the kind of independent high-street trader that gives Harold Wood its village feel. Above the shops, flats at 41A and 43B tell the familiar story of London's intensification — retail below, residential above. 📍 Street View: Station Rd

Along Gubbins Lane

Head north-west from the station and you're on *Gubbins Lane*, the busiest road in our sample. The NGD data tells us it's a **B Road (B175)** — classified, with an average width of around 8.5m. Street lighting? *Fully lit*. Pavement coverage is 100%, with an average width of 1.7m on each side. At number 69, the semi-detached houses begin — classic 1930s London suburban stock. Then at 63, **Bell Flower Lodge** rises — a modern apartment block with at least 74 flats, its presence signalling the newer development that has reshaped parts of Harold Wood. Up at 120A, terraced housing returns. 📍 Street View: Gubbins Lane

The Residential Heart: Athelstan Road & Ethelburga Road

Turn east off Gubbins Lane and you're into the Anglo-Saxon named streets that define Harold Wood's residential character. *Athelstan Road* is a quiet local road — around 6.6m wide, fully lit, pavement on both sides. It runs from number 2 at the southern end (semi-detached, RM3 0QB) all the way to the 50s. At number 31, the semi-detacheds are classic interwar builds. The community hub sits here too — **Athelstan Hall**, classified as a public/community facility, anchoring the neighbourhood. 📍 Street View: Athelstan Hall

Cross over to *Ethelburga Road* and the pattern continues — terraces at number 33, converted flats at 4B and 6C, and at the eastern end, **St. Ethelburga Court**, a

purpose-built apartment block with at least 16 units. The road is unclassified, around 5.7m wide, and fully lit. 📍 Street View: St Ethelburga Court

The Drive & The Ridgeway — Leafier Ground

Head west and you reach *The Drive*, where the housing steps up. At number 3, there are terraces, but by 45 and 53 you're among the detached and semi-detached homes of RM3 0DU — wider plots, deeper front gardens. This is the more aspirational end of Harold Wood. Parallel to it, *The Ridgeway* carries similar character — semi-detacheds at numbers 12, 43, and 54, along a fully lit local road with pavement on both sides. The road data shows 100% pavement coverage and an average width of 7.4m. 📍 Street View: The Drive

The New Harold Wood: Wildcary Lane & St Clements Avenue

South-west of the station, the streets tell a different story. *Wildcary Lane*, *Charlock Close*, *Safflower Lane*, *Huntingdon Drive* — these are the new-build streets of the Harold Hill/Harold Wood regeneration. The UPRNs here are overwhelmingly flats: Thistle House, Wayfaring Court, Baneberry Lodge. The road data for *St Clements Avenue* is notable — it shows **100% cycle lane coverage**, one of the few roads in our sample with any cycle infrastructure at all. Average road width is 7.8m with good pavement (average 1.98m wide).

📍 Street View: Wildcary Lane area

The Industrial Edge: Church Road & Bates Estate

Follow Church Road north-east and you hit *Bates Industrial Estate* — the commercial backbone. Here you'll find **International Water Solution** (Unit 1A, workshop/light industrial), **Essex Electric** (Unit 1E), and warehouse units at number 26. This is Harold Wood's working edge — away from the residential

streets, where the postcode transitions from homes to enterprise.

📍 Street View: Bates Industrial Estate

Southward: Squirrels Heath Road & Hamilton Drive

The southern boundary of our sample area runs along *Squirrels Heath Road* — a mix of semi-detached and detached homes. Number 149 is a detached property, 152 and 154 are semis. Turn into *Hamilton Drive* and you find a long residential street with terraces at 99 and 101, and converted flats at 94 and 121. The road link data shows it's fully lit with 100% pavement coverage and an average road width of about 7m. 📍 Street View: Squirrels Heath Rd
